

PB2015-04-SM-CKOV-00	APPLICO PARTS BULLETIN
MODELS:	VARIOUS
PARTS:	816291317, 816291316 - PROGRAMMERS
ISSUE:	INTERCHANGEABILITY OF 1 AND 2 RELAY TIMERS

To All Service Agents,

The above programmers are now the default for almost all Smeg cookers and some ovens.

OLD PART	NEW PART	DESCRIPTION
816290735	816291317	Dual relay programmer/timer
816290347	816291316	Single relay programmer/timer

The dual relay timer can be utilised in a single relay product (in cases where there is no supply of the correct part) by ignoring the second relay, i.e. no wires connected to it. Below are the pin-outs of the three suppliers for the 816291317 timer.

Emerson – ignore 2a and 2.

Invensys – ignore 1 and 1a.

Okida – ignore 1 and 1A.
